

Strategic Projects – Forward Plan – August 2017

Local Jobs First – Victorian Industry Participation Policy (VIPP) ensures that when we build the infrastructure and manufacture assets that make great communities, we're creating local jobs and opportunities for Victorian businesses, suppliers and workers. As we remove level crossings, build roads, schools and hospitals and deliver new trains, trams and buses, the Victorian Government is using its purchasing power to put local jobs and local businesses first.

The Forward Plan of *Local Jobs First* - VIPP Strategic Projects outlines current and upcoming projects, providing industry with early notification of project information and the opportunity for business to register their interest to supply into the projects.

Since November 2014, 57 projects have been determined as *Local Jobs First* – VIPP Strategic Projects, with three projects already completed and a number well underway, supporting many local businesses and their workers.

These projects represent an investment of over \$47 billion and are expected to support thousands of jobs across Victoria. Another 15 VIPP Strategic Projects are expected to be released to the market in the next few months, with a further 11 planned for 2018.

VIPP Strategic Projects have minimum local content requirements and other conditions set by government, providing opportunities for local small and medium enterprises (SMEs) to supply into government contracts.

Victorian SMEs are encouraged to register their business with ICN Victoria and along with this outline their full capability and recent experience.

For further information on the projects refer to the webpage links in this plan. To register your interest to supply into these projects, please visit forwardplan.icn.org.au

For further information on *Local Jobs First* - Victorian Industry Participation Policy (VIPP) please visit vic.gov.au/vipp
